Please note that the screenshots in this User Guide show the colour blue, but in our live system these colours have now changed to green.

Version 3.0

How to duplicate a multi-variant listing

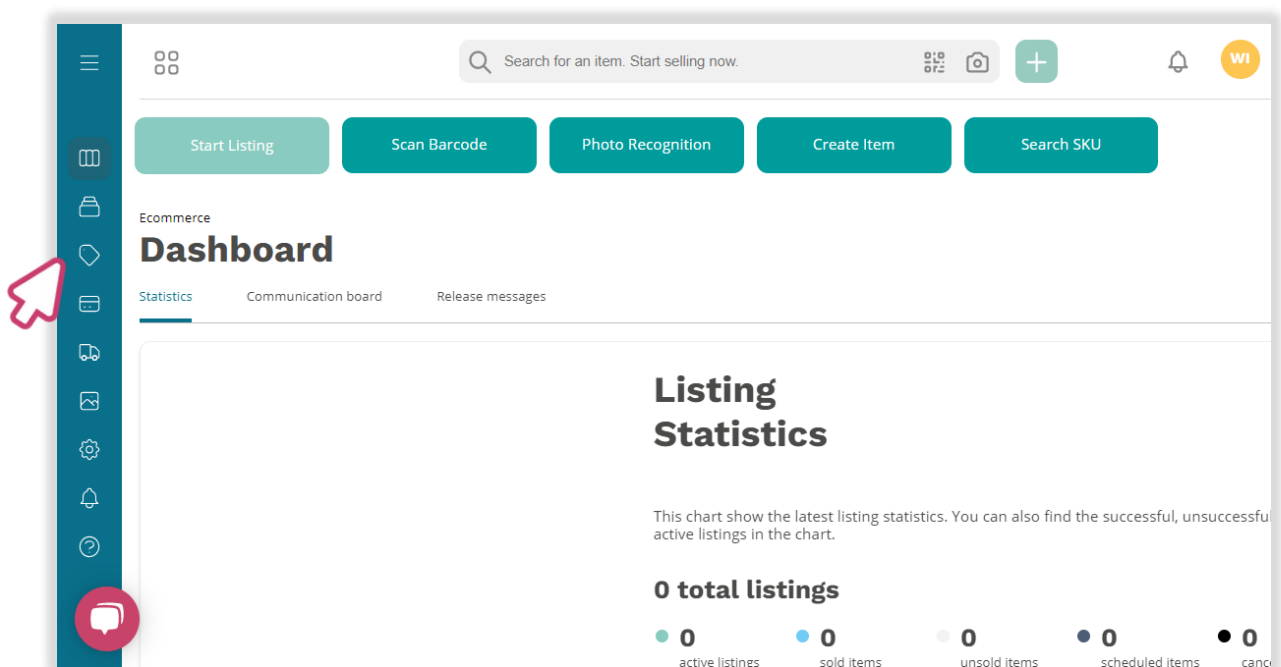

Within your World of Books Ecommerce account, you can duplicate a multi-variant active listing using information from the existing listing. For example, if you received two or more similar items, you could easily duplicate these items using one of your active listings and list them on multiple marketplaces.

To be able to duplicate a current listing, your account role must include this privilege.

To duplicate an existing listing;

Login to your account.

From the dashboard left-hand menu, click the 'Listings' icon.

How to duplicate a multi-variant listing

From the 'listings' menu, click on the 'Active listings' tab.

How to duplicate a multi-variant listing

From the pop-up screen, you will be presented with two cloning options:

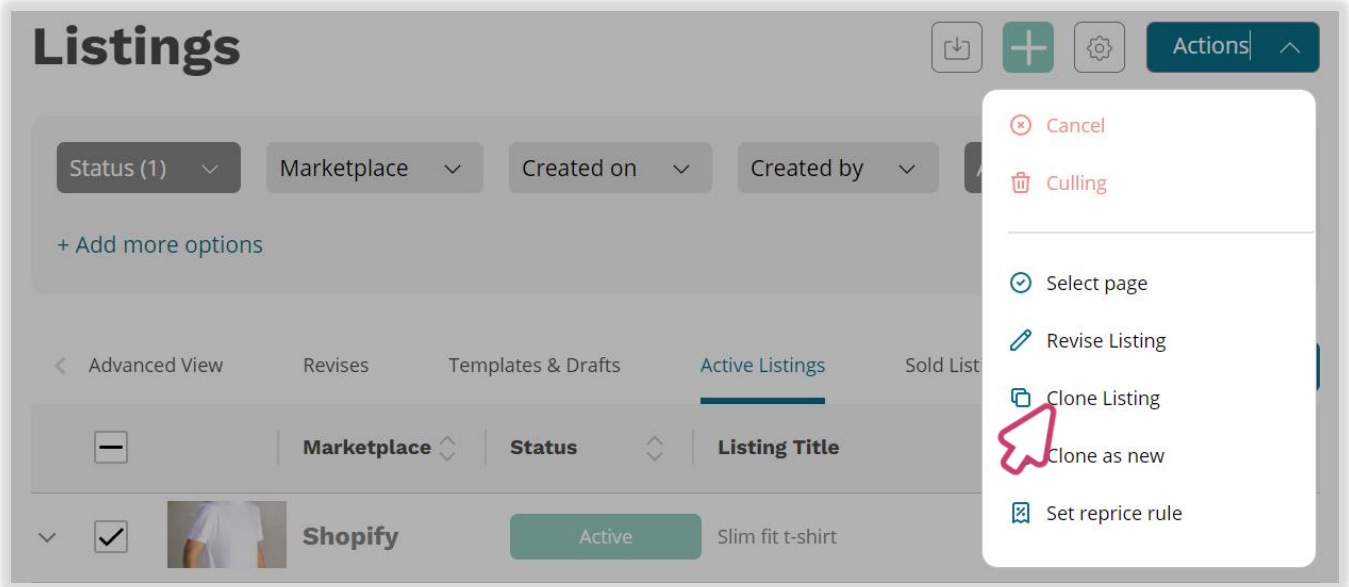

'Clone Listing' - This involves creating a listing based on the same item. All information relating to the existing listing, e.g., item description, variants, images, pricing, policies, etc., will be incorporated into the listing form. Once the listing is submitted, the item will not be added to your inventory, as it already exists. However, if changes are made to inventory data while cloning, the system will automatically adjust the inventory.

'Clone as new' - As the name implies, all information relating to the existing listing, e.g., item description, variants, images, pricing, policies, etc., will be incorporated into the listing form. By selecting this option, the system will create the listing and also add the item as new to your inventory. You can select this option if you want to add the item to inventory "as new" once the listing is submitted.

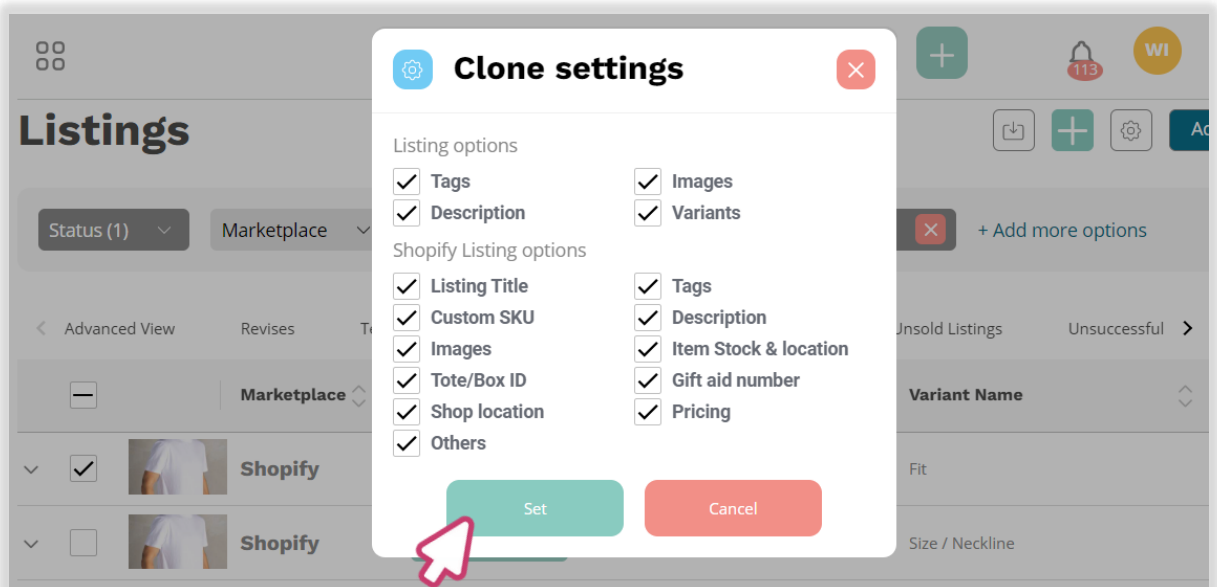

How to duplicate a multi-variant listing

For this example, we will be selecting "Clone Listing" from the pop-up screen.

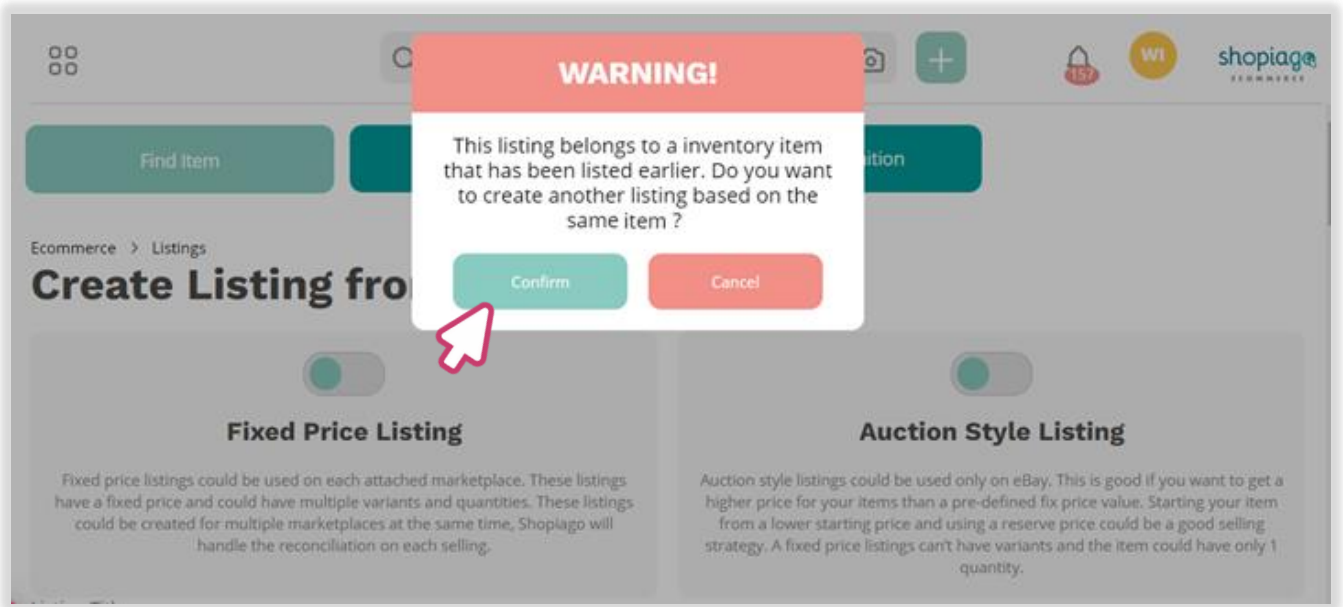

From the pop-up screen, add or remove the clone characteristics that you want to include or exclude in the listing form, and click on the 'Set' button once you are ready. (This is basically to add or remove certain information associated with the existing listing).

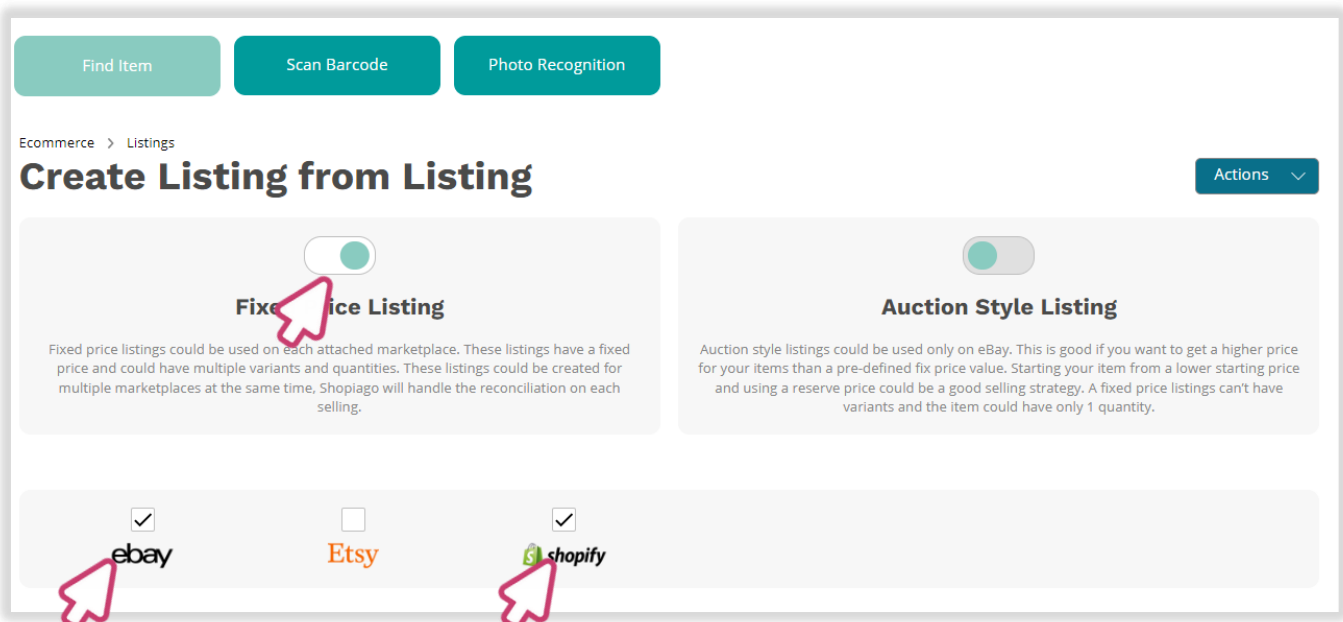

How to duplicate a multi-variant listing

Then click on the 'confirm' button, to create a listing based on the same item.

From the listing information page, select a buying format. As an example, 'fixed price listing'.

Update or add additional marketplaces for the listing.

How to duplicate a multi-variant listing

Go through the listing title and description to make sure all the information is correct, and make changes if necessary.

Then click on the 'HTML field' and select a template from the drop down.

To preview the selected HTML template, click on the "quick view" icon, and then click on the "close" icon on the top right hand side of the next screen to return back to the listing form.

How to duplicate a multi-variant listing

Once you've decided on the item price, click on the 'Price' field and enter the item price.

Custom SKU' (Stock Keeping Unit) will automatically populated for each variants.

You can add a tag (s) to the item. This is for internal use for categorising listings—as for example, 'Men's T-shirt'.

Enable 'Collect in Store', if you want buyers to collect the item in store. (To use this feature, the account owner or administrator must add these to the shipping methods).

Turn-on 'Job Lot Item' switch, if you are selling the item as a group. If not, leave Off.

Update or add additional item photo(s) if necessary.

The screenshot shows a product listing form with the following elements:

- Price:** A text input field containing the value '17'. A red mouse cursor icon points to the field.
- Custom SKU:** A text input field containing the value 'XY2000125481-2'. A red mouse cursor icon points to the field.
- Tags:** A section with a blue button labeled 'Men's T-shirt' and a text input field labeled 'Enter a new tag'. A red mouse cursor icon points to the 'Enter a new tag' field.
- Collect in store:** A toggle switch that is currently turned on (green). A red mouse cursor icon points to the toggle.
- Job lot item:** A toggle switch that is currently turned off (grey). A red mouse cursor icon points to the toggle.
- Images (1/12):** A section showing a thumbnail image of a man in a white t-shirt. To the right is a large grey area with a camera icon and the text 'Browse or drop your images here'. A red mouse cursor icon points to the camera icon.

Modifying listing information for eBay

Select an eBay account for the listing.

Click on the 'Custom Listing Title' field to modify the title if necessary.

Check that the item is in the right category. If not, you can update it.

The image shows a side-by-side comparison of the 'Account' and 'Listing' sections of the eBay and Shopify seller interfaces. Red arrows highlight the 'Account' dropdown, the 'Custom Listing Title' field, and the category selection area on the eBay side, and the 'Account' dropdown and 'Published on' field on the Shopify side.

eBay Item specifics

Item specifics are required when listing to eBay marketplace and once you get it right, it can boost sales. Below are three categories for item specifics;

Required

eBay requires mandatory attributes for this category. It will help customers to find items when they perform a search.

On the marketplace, buyers usually filter their search by using item specifics. Making it easier for them to find what they are looking for.

If you haven't entered one of these specifics, the item will drop off the search and therefore it won't be visible to customers.

Recommended

Your listing will perform better if you fill in these recommended attributes.

It could reach a higher search position and will show up in more search results.

This is not mandatory but if you have these details, please enter them.

Optional

You can add additional attributes to your listing but this is not mandatory.

These attributes will be shown on the listing but may not be used during eBay search.

This doesn't affect buyer's search but could improve customers experience.

Modifying the item specifics

Click on the 'Edit' item specifics button, to confirm that all specifics are similar.

Updating eBay pricing and payment

Confirm that 'Vat %' and listing donation percentage' are correctly entered. To do this, click on the 'Pricing & payment' 'edit' button to modify.

The screenshot shows the 'Pricing & Payment' section of an eBay listing. At the top, there is a dropdown menu labeled 'New with tags'. Below it is a 'Condition description' field with the text 'Excellent condition'. A list of three items is shown, each with a green checkmark icon and an 'edit' button. The items are 'Item Specifics', 'Pricing & Payment', and 'Policies'. A red mouse cursor is pointing at the 'edit' button for 'Pricing & Payment'.

From the pop-up screen, modify or key-in the item VAT %. This only applies to new goods. Leave it blank if the item is not new.

Click on the 'Donation percentage' field to select a 'Listing Donation Percentage' for the item. This is the amount you are donating for the item. If you are a charity then this should automatically be set to 100% in your settings.

The screenshot shows the 'Pricing & Payment' pop-up screen. It has a title bar with a blue icon, the text 'Pricing & Payment', a red close button, and a yellow 'WI' button. The main content area is divided into two sections: 'VAT' and 'Donation Percentage'. The 'VAT' section has a text input field with '20' and a '%' symbol, a 'Best offer' toggle switch, and a 'Private listing' toggle switch. The 'Donation Percentage' section has a vertical slider with values from 75 to 100 and a '%' symbol. A red mouse cursor is pointing at the 'VAT' input field, and another red mouse cursor is pointing at the 'Donation Percentage' slider.

Updating eBay pricing and payment

You can, Switch - On the 'Best Offer' toggle switch if necessary. This allows buyers to submit an offer for what they are willing to pay (you can decide whether to accept or make a counter-offer).

Enter the amount you are willing to automatically accept as well as the lowest amount to automatically decline.

Switch on 'Private Listing' if necessary, to keep buyers identities hidden from other eBay members.

And then, click on the 'Set pricing' button to save changes.

Updating variants information

Variations (variants) are sets of items that are related but differ in terms of their characteristics, e.g., size, colour, etc. If the existing listing is multi-variant, you can update or add additional variations if needed.

To update the item Variants:

Click on the 'Edit' variants' button.

	Colour	Custom SKU	Price	Quantity	EAN	
M	Black	XY2000125481-1	1	- 1 +		Set Inve

Inventory data

Setting inventory data for variants will help you manage and track your stock record when you list multi-variant items on a single or multiple marketplaces. When one of the items is sold, the system will adjust the inventory level for each sale.

However, when "cloning" a listing (not as new), you would not be able to update the inventory properties as the item already exists in your inventory. On the other hand, if the item quantity is updated, then the system will automatically adjust the inventory once the item is listed.

Once you've clicked on the 'Create listing' button, you will be prompted to select one listing type:

List immediately – select this option if you want the item to go live instantly.

Add to queue - means the item will be sent to eBay at a scheduled time that you have determined within your settings.

List on date – a set date that you want the item to go live on eBay.

The screenshot shows a 'Listing create settings' dialog box with a title bar containing a gear icon and a close button. The dialog has several sections: 'Listing type' with three radio button options ('List Immediately', 'Add to queue', 'List on a date'), 'Auto cancel after days' with an empty input field, and 'Reprice rule' with a dropdown menu showing 'DISCOUNT'. At the bottom are three buttons: 'List it' (teal), 'List it & create new' (dark teal), and 'Cancel' (red). A red mouse cursor is pointing at the 'Add to queue' option.
